Dynamics 365 Sales

Understanding the standard to challenge requirements better

Obernais – Day 1 - 13/10/2026

Rodrigue YENGO – MCT & MVP ARCHIA365

Product Owner / Business Analyst level · 2 days · ARCHIA365

What you will be able to do in two days

1

Distinguish

the Microsoft standard from Hager customisations, and assess the consequences

2

Explain

the end-to-end sales process and the logic of the data model

3

Spot

native features you do not use yet and their business value

4

Manage

with reporting, goals and native forecasting

5

Position

Power Platform, Teams, Outlook, Power BI and Copilot in a process

6

Challenge

a requirement with the "standard first" grid and prioritise gaps

Two days, one common thread

ARCHIA365

Day 1 · The standard and the sales process

9:00	Opening and running case
9:30	M1 · Sales in the ecosystem
10:45	M2 · Configuration overview
11:15	M3 · Standard data model
13:30	M4 · Leads and conversion
15:15	M5 · Opportunities to invoices
16:45	Workshop 1 · Fit-gap

Day 2 · Customer relationship, management, ecosystem

9:00	Day 2 kick-off
9:15	M6 · Interactions and relationship intelligence
10:45	M7 · Analytics and forecasting
13:30	M8 · Ecosystem and customisation
15:00	M9 · Good practices and case studies
16:15	Workshop 2 · Gap summary
17:15	Wrap-up

Three questions in every module

1

What does the standard offer?

Dynamics 365 Sales native tables, processes and features

2

Why did Microsoft design it this way?

The design rationale and the related good practices

3

What does Hager do today?

The gap, its justification and its implications

ARCHIFRIDAYS, our running case

- Fictitious group providing solutions for electrical installations, headquartered in Obernai
- Paris (France and key accounts), Blieskastel (ARCHIFRIDAYS Deutschland), Frankfurt (DACH)
- Diffuse channel (installers, distributors) and Project channel (specifiers, influencers)
- A heavily customised Dynamics 365 Sales Enterprise since 2019, connected to SAP and Eloqua

1.9 bn€

revenue

2 channels

Diffuse and Project

600

CRM users

Six pain points at the start of "Back to Standard 2027"

1

"Project Web" table

people involved and roles, alongside the standard

2

140 columns

on the opportunity, a third empty, redesign under way

3

Enriched account

account plan, range qualification, share of wallet

4

Leads from 3 sources

Eloqua, Lead App, manual entry, no single source

5

Quotes and forecast

quotes re-entered in SAP, forecast built by hand in Excel

6

Interactions

emails outside the CRM, custom meeting objectives

The pain point wall

1. Write 3 Hager CRM pain points, one per sticky note
2. Note the sales cycle stage and channel (Diffuse / Project)
3. Stick them on the wall, by stage and by channel

Duration

10 min

Output

The wall feeds the fit-gap grid in workshops 1 and 2

M1

Dynamics 365 Sales in the ecosystem

Day 1 · 9:30-10:30 · Episode 1: which app, which licence?

Key terms: ecosystem and licensing

English	French
Dataverse	Dataverse
Model-driven app	Application pilotée par modèle
Sales Hub	Sales Hub (application Ventes)
Environment	Environnement
Release wave	Vague de publication
Sales Enterprise	Sales Enterprise
Sales Premium	Sales Premium
Copilot in Dynamics 365 Sales	Copilot dans Dynamics 365 Sales

?

Question for the group

Which of these terms do you already use at Hager day to day?

A common foundation: Dataverse

Apps	Sales Hub, model-driven apps, Power Apps
Cross-cutting services	Copilot, Power Automate, Power BI, Teams, Outlook
Dataverse	shared standard tables, security, processes, APIs

The closer the CRM stays to standard tables, the more it benefits from new features without a project

Three licence tiers, one allocation logic

Pro

Sales Professional

Core process: leads, opportunities, quotes, catalogue

Ent

Sales Enterprise

ARCHIFRIDAYS and Hager licence: native forecasting, goals, Copilot

Pre

Sales Premium

Outside current licence: predictive, relationship analytics

Two waves a year, features often under-used

The release cycle

- Two release waves a year, in April and October
- Preview, then general availability
- Release plans published in advance

Often under-used

- Pipeline view
- Sales accelerator and sequences
- Relationship analytics (Premium)
- Copilot in Dynamics 365 Sales

Module 1 key message

Key message

A 2019 customisation may have since become a native feature

! Watch out

Enterprise licence: predictive features and relationship analytics are Premium options

PO Product Owner angle

Follow the release plan and review customisations every year

Workbook exercise 1: known native, unknown native, switched-off native. Break 10:30-10:45

M2

Configuration overview

Day 1 · 10:45-11:15 · Episode 2: who sees what?

Key terms: security and visibility

English	French
Business unit	Unité commerciale
Security role	Rôle de sécurité
Access level	Niveau d'accès (portée)
Owner team	Équipe propriétaire
Access team	Équipe d'accès
Column security profile	Profil de sécurité de colonne
Manager hierarchy	Hiérarchie de responsables
Sharing	Partage

?

Question for the group

Which of these terms do you hear in your discussions with IT at Hager?

Five mechanisms to decide who sees what

1

Business units

Organisation structure and default scope

2

Security roles

Privileges per table and access level

3

Teams

Shared access: owner teams or access teams

4

Column security

Protecting a sensitive data item

Manager hierarchy: a manager sees their team's data

Module 2 key message

Key message

Start from visibility needs, not from the org chart

! **Watch out**

An overly granular security model costs maintenance, support and performance

PO **Product Owner angle**

Challenge any new role request: an access team or column profile is often enough

Workbook exercise 2: sketch on one page who sees what, by channel and by country

M3

The standard sales data model

Day 1 · 11:15-12:30 · Episode 3: modelling Campus Lumière

Key terms: sales data model

English	French
Lead	Prospect (lead)
Opportunity	Opportunité
Potential customer	Client potentiel
Stakeholders	Parties prenantes
Connection role	Rôle de connexion
Sales team	Équipe commerciale
Competitor	Concurrent
Price list	Liste de prix

?

Question for the group

Which of these terms do you use day to day at Hager?

One table per sales cycle stage

ARCHIA365

1

Lead

Unqualified data

2

Opportunity

Estimate and products

3

Quote

Price commitment

4

Order

Customer agreement

5

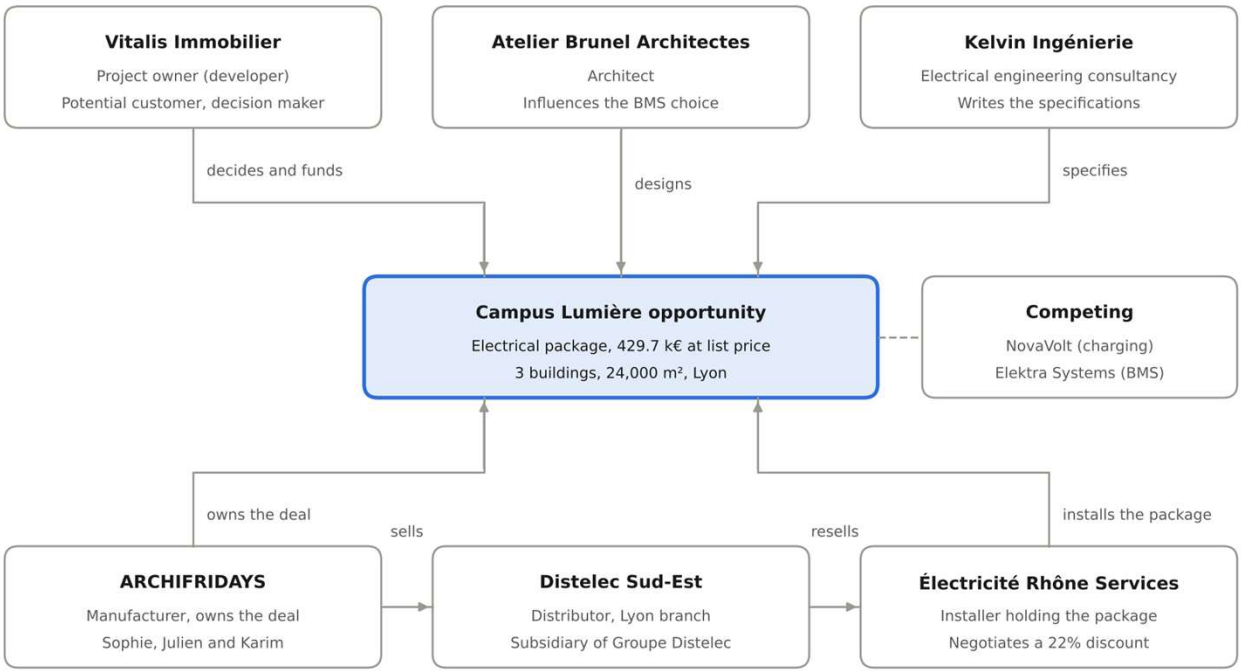

Invoice

Often in the ERP

Around them: accounts and contacts, catalogue (families, units, price lists), competitors, connections, activities

Campus Lumière: five organisations, one project

Four stakeholders shape the decision, only one is invoiced by ARCHIFRIDAYS

Workshop: who is the potential customer?

1. Place the 5 organisations in the standard model
2. Choose the opportunity's potential customer
3. Link the others as stakeholders, with a connection role

Duration

25 min in pairs

Output

One proposal per pair, presented and compared with Project Spider

Custom table or standard model?

Custom "Project Web" table

- × Links parties and roles its own way
- × Duplicates stakeholders and connections
- × Ignored by native features
- × Out of reach of Copilot updates
- × Maintained at the company's expense

Standard opportunity

- + Stakeholders and connection roles
- + Visible from account and contact
- + Sales team and competitors linked
- + Basis for native features and Copilot
- + Evolves with every Microsoft wave

Module 3 key message

Key message

A custom table that duplicates the standard cuts off access to native features

! **Watch out**

Project Web and Project Spider: compare features, based on Hager's documentation

PO **Product Owner angle**

The ongoing opportunity redesign is the chance to go back to standard stakeholders

Keep your list of tables that could go back to standard. Lunch 12:30-13:30, then leads

M4

Lead management and conversion

Day 1 · 13:30-15:00 · Episode 4: the 47 trade show leads

Key terms: leads and conversion

English	French
Lead source	Source du lead
Campaign	Campagne
Duplicate detection rule	Règle de détection des doublons
Qualify	Qualifier
Disqualify	Disqualifier
Lead to Opportunity business process flow	Processus d'entreprise « Lead to Opportunity »
Predictive lead scoring	Notation prédictive des leads
Sequence	Séquence

?

Question for the group

Does the word "lead" mean the same thing in the Lead App, in Eloqua and in the CRM at Hager?

The standard lead lifecycle

ARCHIA365

1 — Capture

Import or form, with source and campaign

2 — De-duplicate

Detection rules on email, account

3 — Qualify

Budget, timeframe, decision maker, need

4 — Convert

Account, contact and opportunity

5 — or Disqualify

With a reason, without deleting

Leads are kept apart from accounts and contacts: the customer base stays clean and the origin stays traceable

The 47 BâtiExpo Lyon leads

30

installers: follow-up sequence (Diffuse)

8

specifiers, Inès scanned twice

4

project owners to qualify (Project)

3

distributors to hand over (Diffuse)

2

to disqualify: student, competitor

The conversion trap

1

Situation

Inès Garnier's lead is recorded under Kelvin Ingénierie

2

Effect

Conversion suggests Kelvin as the opportunity's potential customer

3

Question

The decision maker is Vitalis Immobilier: which qualification rule should apply?

Follow up (Enterprise), score (Premium)

Predictive scoring: Premium, not licensed

- Score calculated from history
- Outside Enterprise licence: option to cost
- Prerequisite: volume of qualified and lost leads

Sales accelerator: Enterprise

- Sequence: email, call, email
- Prioritised work list for Karim
- Included with limits, to be checked

Module 4 key message

Key message

Without a single source and campaign, marketing ROI cannot be measured

! Watch out

Lead App, Eloqua, CRM: decide which tool is the reference before customising the Lead entity further

PO Product Owner angle

The qualification and channel routing rule is a PO deliverable, not a setting

Exercise 4: draw the current Hager lead lifecycle (Lead App, Eloqua, CRM) and compare it with the standard

M5

Opportunities, quotes, orders and invoices

Day 1 · 15:15-16:45 · Episode 5: from opportunity to invoice

Key terms: from opportunity to invoice

English	French
Business process flow	Processus d'entreprise
Price list	Liste de prix
Opportunity product	Produit d'opportunité
Quote	Devis
Revise (a quote)	Réviser (un devis)
Order	Commande
Invoice	Facture
Master data	Donnée maître

?

Question for the group

Which of these terms do you use every day at Hager?

The opportunity business process flow

ARCHIA365

1

Qualify

Contacts, budget, need

2

Develop

Solution, stakeholders, competitors

3

Propose

Products, quote, presentation

4

Close

Decision, won or lost, reason

Estimated revenue calculated from products: 429,700 € at list price for Campus Lumière

Two quotes, one request outside policy

429,700 €

list price

365,245 €

quote V1, 15% discount

343,760 €

quote V2, 20% discount

22%

asked by ERS, approval needed above 18%

The CRM / ERP boundary is a decision

The CRM holds the commitment

- × Opportunity, estimate, competitors
- × Quotes and revisions
- × Order generated from the won quote
- × SAP invoicing status, read-only

SAP (the ERP) holds execution

- \+ Reference prices and terms
- \+ Delivery, logistics
- \+ Invoicing and accounting
- \+ Customer master data in SAP

To discuss before the workshop

?

Where should price calculation live: CRM, SAP or a quote configuration tool?

?

Delivery spread until 2028: one order or several?

?

The invoice in the CRM, or just its SAP status?

?

What do we lose with an Excel quote re-entered in SAP?

Module 5 key message

Key message

The CRM / SAP boundary is a decision: each object has a master and a shared status

! Watch out

No native discount approval flow: a Power Automate extension, covered in module 8.

PO Product Owner angle

For each stage, name the master system, the flow direction and the status visible in the CRM.

Workshop 1: apply this reading grid to the Hager process, from lead to invoice.

Workshop 1: sales process fit-gap

1. 10 min: get familiar with the ARCHIFRIDAYS answer key
2. 25 min: complete the pre-filled Hager grid
3. Qualify each topic: fit, justified gap, gap to challenge
4. 10 min: present the 3 most significant gaps

Duration

45 min: Diffuse and Project

Output

Workshop_Fit_Gap.xlsx, "Hager grid" sheet

End of day 1

The CRM holds the sales commitment, the ERP holds execution

Tomorrow: customer relationship, sales management, the Microsoft ecosystem and the Hager gap summary
