Positioning and Learning Assessment Quiz

Dynamics 365 Sales Training, Product Owner / Business Analyst Level

ARCHIA365

Name: …… ☐ Positioning (opening) ☐ Learning assessment (closing)

The same questionnaire is taken at the opening and at the close to measure progress. Only one correct answer per question, unless otherwise stated. Duration: 15 minutes.

1. Which data platform does Dynamics 365 Sales run on?

☐ A. SharePoint ☐ B. Dataverse ☐ C. Customer-managed Azure SQL Database ☐ D. Excel Online

2. An organisation has created a custom "Project Web" table that captures the parties involved in a project and their role, in parallel with the standard Stakeholders and Connection roles. What is the main risk?

☐ A. None, it is a good practice ☐ B. Double entry, and parties invisible to the native features that rely on Stakeholders and connections (Copilot, Relationship analytics, standard views) ☐ C. No longer being able to create Accounts ☐ D. No longer being able to send emails

3. To describe the engineering consultancy and the installer on a deal whose customer is the project owner, the standard offers:

☐ A. Three separate Opportunities ☐ B. Stakeholders and Connection roles ☐ C. A free-text column ☐ D. A single Account grouping all three

4. Why is the Lead kept separate from Accounts and Contacts?

☐ A. For licensing reasons ☐ B. To avoid mixing unqualified data with the customer base and to trace the origin through to revenue ☐ C. Because Leads cannot have an email address ☐ D. To delete them automatically after 30 days

5. Which information is essential to measure the return on investment of a trade show?

☐ A. The stand number ☐ B. The source and campaign of the Lead ☐ C. The size of the company ☐ D. The name of the salesperson present at the show

6. A customer asks for a 22% discount and the policy requires approval above 18%. In the standard:

☐ A. A native approval is built into the Quote ☐ B. There is no native approval workflow; it is added, for example, with Power Automate ☐ C. A plug-in must be developed ☐ D. It is impossible

7. A Quote must be changed after it has been sent. The standard good practice is:

☐ A. Create a new Quote by copying ☐ B. Revise the Quote, which keeps the version history ☐ C. Edit the PDF that was sent ☐ D. Delete and recreate the Opportunity

8. Which statement about the CRM / ERP boundary is the most accurate?

☐ A. The Invoice must always be mastered in the CRM ☐ B. The CRM carries the sales commitment, the ERP carries execution; the boundary is decided explicitly ☐ C. The CRM must replace everything ☐ D. The ERP must hold the Opportunities

9. A deal has had no activity for 3 weeks. Which native mechanism can flag this to the salesperson?

☐ A. Assistant cards or Copilot insights ☐ B. The Column security profile ☐ C. The Price list ☐ D. The Unit group

10. Why does Server-side synchronization with Exchange improve relationship intelligence?

☐ A. It speeds up opening forms ☐ B. It automatically captures emails and appointments, the basis for signals and analytics ☐ C. It replaces Teams ☐ D. It removes the need for Contacts

11. In native Forecasting, what happens when a manager adjusts a salesperson's row?

☐ A. The underlying Opportunity is changed ☐ B. The adjusted value rolls up, the original value stays visible and the Opportunity is not changed ☐ C. All the salesperson's Opportunities move to the Committed category ☐ D. The forecast is exported to Excel

12. Won 202 k€, Committed 611 k€, target 1,600 k€. What is the Won + Committed coverage?

☐ A. 13% ☐ B. 38% ☐ C. 51% ☐ D. 89%

13. A business user requests a "Number of charging points" column on the Opportunity, whereas the charging stations already appear in the opportunity products. The PO's response:

☐ A. Create the column immediately ☐ B. Look for the real need (an indicator) and build it in a view or a report ☐ C. Refuse without explanation ☐ D. Request a plug-in

14. Rank from the lowest to the highest maintenance cost:

☐ A. Development, low-code, configuration ☐ B. Configuration, low-code, development ☐ C. Low-code, configuration, development ☐ D. They are equivalent

15. Several answers possible. Which of the following are common mistakes in Dynamics 365 Sales projects?

☐ A. Replicating the old tool exactly ☐ B. Adding a column for every request ☐ C. Following the Microsoft release plan ☐ D. Leaving reference data without an owner

Score: …….. / 15
